## Consumer Allocation for 2006

Under provisions of the Electric Utilities Act, each year the Balancing Pool is required to forecast its revenues and expenses and to determine whether any excess or shortfall of funds will be allocated to, or provided by, electricity consumers. In 2001, a rebate of some \$2 billion was distributed to Alberta electricity consumers and no charge to consumers has subsequently been assessed.

Based on our updated forecast we are advising there will neither be a consumer charge collected nor a rebate paid in 2006. The allocation will continue to be reviewed for 2007 and all years thereafter.

Please contact the undersigned should you have any questions in this regard.

Yours truly,

Gary Reynolds  
President and CEO
